I just want to second the kudos to the PH team for a great job at the NRRB. I hope you didn't take any of my questions and comments in the meeting to mean I don't think you are doing a great job on developing a preferred remedy and fielding the myriad NRRB/CSTAG questions – you did great on both counts!

Subject: Congratulations to the Portland Harbor Team!

I just wanted to send a quick note to let you all know that we've reached an important milestone at Portland Harbor! On Wednesday of this week, Kristine Koch provided a summary presentation of all the work completed to date on the Portland Harbor project to the National Remedy Review Board and the Contaminated Sediments Technical Advisory Group. Kristine, along with Elizabeth Allen, Silvina Fonseca, Amy Legare, Anne Christopher, Sean Sheldrake, Steve Ells, David Charters, Eva DeMaria, and Lori Cora have worked tirelessly for several months to make this important deadline—congratulations!

At the meeting, we also heard from five of the six Tribes: The Nez Perce, Warm Springs, Siletz, Grand Ronde and Yakama. Their presentations touched on the non-scientific significance of this cleanup and their messages were powerful.

Overall, the meeting was a huge success and I want to thank the team for all their hard work. I know there are a lot of people that support this team in many important ways that I didn't mention—thank you for all that you do.
